Tuition Calculation

Tuition is determined by the length and total number of classes a student is registered for.

Single Class Enrollment:

Refer to the Tuition Rates section below to find the class cost, then add GST

Multiple Class Enrollment:

Calculate the total cost by summing the individual class fees listed in the schedule. Then, deduct applicable Tuition Discounts based on the number of classes taken, and finally, add GST.

Online Registration Process:

The online registration system automatically calculates class hours and discounts but requires payment of the Registration Fee and June Tuition to finalize registration. Once the office receives your registration, the initial payment will be applied as a credit to your account, and you will receive an email detailing the remaining balance owed. *Please note that this process may take a few days depending on registration volume*
